

## MONTHLY UPDATES | VOLUME NO. 19

**Child Heart Foundation** observed World Pulmonary Hypertension Month through PH stories, which included real life stories of our patients.

 <p><b>PH Stories Series – Bringing Stories of Patient with Pulmonary Hypertension for learning and Awareness</b></p>		
 <p>Chintu and his friend Raju was playing football</p>	 <p>Chintu suddenly fainted while playing and Raju was shocked to see this</p>	 <p>Chintu's parents Seema and Suraj were shocked to see Chintu in PH condition</p>
 <p>After the check up it was suggested by the Doctor that Chintu undergoes a detailed screening by a Pediatric Cardiologist</p>	 <p>Chintu was immediately taken for a check up in the nearest hospital</p>	 <p>Seema and Seema also observed the sign of Chintu had turned Blue</p>
<p>To know what happened check the concluding part of the story in the next post</p>		

 <p><b>PH Stories – Story of Chintu Part II</b></p>		
 <p>Chintu underwent screening at Thursday OPD of Child Heart Foundation</p>	 <p>Doctors of Child Heart Explained Mrs. Seema that Chintu has been diagnosed with Pulmonary Hypertension and requires continuous life saving medication</p>	 <p>Child Heart Foundation counselled Seema and Suraj and registered Chintu in PH Life Care Program to provide financial assistance for their medicines</p>
 <p>Child Heart Foundation through its network of medicine distributors and volunteers delivered the Life Saving Medicines at doorsteps of Chintu</p>	 <p>Chintu has been coming for the follow up check ups on a quarterly basis</p>	 <p>Chintu is growing and does all the activities like children of his age. He is taking continuous medication, following a healthy lifestyle and undergoing health check ups</p>

“It was a very interesting session with wealth of knowledge shared by the experts and survivors. All the sessions were engaging and informative”- Vaishali

## On Ground Interventions

Due to COVID-19, children were finding it difficult to procure medicines, our field staff and workers, made it a point to help our children.

Piyush aged 11 years diagnosed with Pulmonary Hypertension received free Life Saving medicines in New Delhi

Varun aged 18 years diagnosed with Pulmonary Hypertension received free life saving medicines in Jaipur, Rajasthan

Vinay aged 18 years diagnosed with Congenital Heart Defect received his prescribed medication at his doorsteps in New Delhi

Himanshu aged 5 years a patient of Tetralogy of Fallot received financial assistance for his Heart Surgery - TOF Repair

## Fundraising Campaigns for the month

**DONATE NOW**

**CHF 10@1000 Campaign**

Donate Rs 1000 to support medicines of 10 children with Pulmonary Hypertension

Every Month We will be contributing 10% of our corpus funds to support treatment of 10 children with Pulmonary Hypertension. We need your support for the rest 90%

**Your donation can help their lungs breathe. Please click on the link below to donate**

**Donate your Zakat and Sadaqah this year to save lives of children suffering from Congenital Heart Defect and Pulmonary Hypertension**

Your donation will help us in sponsoring medicines, conducting heart surgeries and providing supportive care for these patients

19 year Old Rubi suffering from Congenital Heart Defect, She requires emergency heart surgery

4 year Old Ashad suffering from Pulmonary Hypertension. He requires continuous medication

8 months old Abu suffering from Congenital Heart Disease. He requires emergency heart surgery

## What CHF supporters had to say!

**Sayema** ✓ @\_sayema · 4h

This is an NGO funded by extraordinary parents for helping children with heart diseases from underprivileged families. I personally know these very kind doctors. They do need funds now to carry on the good work. See if u could help.

[@UNICEFIndia](#), request you to help.

**Child Heart Foundation** @ChildHeartFndn · May 8

Support us in our pledge for 2020 to add 10 more patients in our PH Life Care Free Medication Program.
