Child Heart Foundation Thanks IDBI Trusteeship at Balakram Hospital, Timarpur Event

On March 7th, the Childheart Foundation hosted a special event at Balakram Hospital, where children and the team from the foundation came together to express their gratitude to IDBI Trusteeship Service Ltd. and the dedicated staff at Balakram Hospital.

The event was a moment of appreciation for the generous support provided by IDBI Trusteeship Service Ltd. and the team at Balakram Hospital. Their efforts have been instrumental in helping the Childheart Foundation provide medical care to children in need. In particular, IDBI Trusteeship Service Ltd. has gone above and beyond by helping 31 children suffering from pulmonary hypertension by providing them with free medicine.

Both the children and the foundation members were filled with thanks for everyone who has contributed to making a difference in the lives of these young patients. It was a reminder of how important it is to work together to help those in need.

The Childheart Foundation is grateful for this partnership and looks forward to continuing this important work alongside IDBI Trusteeship Service Ltd. and the wonderful team at Balakram Hospital.

CHF Research & Insight

Congenital heart disease (CHD) is one of the most prevalent birth defects worldwide, impacting approximately 1 in every 100 live births. It encompasses a wide range of conditions, from mild defects to more complex conditions that demands surgical correction or lifelong medical management. The most popular CHD in children includes Atrial Septal Defect (ASD), Ventricular Septal Defect (VSD), Tetralogy of Fallot, and Coarctation of the Aorta. The root cause behind are largely unknown, but conditions like Down Syndrome, family history of heart disease, diabetes, obesity, viral infections during pregnancy etc. can affect fetal development. If detected early can have a positive outcome for children born with CHD.

CHD also poses significant threat to pregnant women having heart disease. It can escalate the risk of heart failure, high BP, arrhythmias and preterm birth putting both the mother and the baby at risk. As a result, proper preconception counselling is required. Collaborations to be made with the cardiologists to provide best care plans on specific heart conditions so as to ensure optimal management on overall maternal health.

PROGRAMME HIGHLIGHTS:

CHF & Gail Gas takes Initiative

On February 18th, the Childheart Foundation, in partnership with GAIL Gas, held a successful medical camp in Meerut Shahjahanpur,

where **220 children** were screened for health issues. During the screening, **10 children** were found to have suspected congenital heart defects and have since received treatment.

This camp highlights the Child heart Foundation's dedication to providing vital healthcare to children in underserved areas, with support from GAIL Gas. The collaboration helped ensure that these children received the care they needed for a healthier future.

Medical Camp Supported by NTPC

On March 27th, the Childheart Foundation, in collaboration with NTPC, held a medical camp in Payavali Gaon,

Dadri, **screening over 188 children** for congenital heart defects (CHD). An awareness session was also conducted to educate the community on CHD prevention.

Awareness Program

On March 26th, the Child heart Foundation, in collaboration with **Concentrix**, held an awareness session at the **UPHC Gandhi Nagar Dispensary in Gurgaon**. The session was attended by **33 ASHA workers, ANMs, and Anganwadi staff**, focusing on the **early detection and prevention of congenital heart defects (CHD)** in children. This initiative aimed to empower local healthcare workers with the knowledge to identify CHD signs and provide timely medical support.

COMMUNITY AWARENESS PROGRAM

On 18th Feb awareness session was held for **38 ASHA workers and Anganwadi staff**, focusing on the importance of early detection and prevention of congenital heart defects. This session aimed to empower local health workers with the knowledge to identify signs of CHD in children and ensure timely medical intervention.

This initiative, supported by GAIL Gas, highlights the importance of both medical care and community education in improving children's health.

EVENTS :

• Holi Celebration :

The Childheart Foundation celebrated Holi with children, the CHF team, and treated kids, spreading joy and togetherness. The event was filled with vibrant colors, laughter, and a sense of unity for all involved.

• Little Hearts, Big Thanks: A New Life for Children in South India

Children from South India organized a heartfelt program to thank the Child heart Foundation & Verizon for giving them a second chance at life by treating their congenital heart defects.

• Childheart Foundation Team Celebrates 12 Years of Impact

life-changing work in providing care to children with heart defects. It was a moment of reflection, gratitude, and excitement for the future.

PROGRAMME HIGHLIGHTS:

CHF and Concentrix Medical Camp in Rohini

The Childheart Foundation, in collaboration with Concentrix, organized a medical camp on Pocket 5, Rohini, Delhi. A total of 181 children were screened, and 2 children were suspected of having congenital heart defects (CHD) and are receiving further treatment. This initiative helped ensure that children in the community received vital health screenings and support.

AWARENESS SESSION IN SULTANPURI WITH MANKIND DISTRICT LEVEL

On March 22nd, an awareness session was held at the district level in Sultanpuri, where **over 86 ASHA workers, ANMs, and Anganwadi staff participated**. The session, in collaboration with Mankind, focused on raising awareness about congenital heart defects (CHD) and empowering local healthcare workers to identify and prevent CHD in children.

Medical Camp in Delhi Slum Areas with ABB

On March 26th, the Childheart Foundation, in collaboration with ABB, organized a medical camp in Jahangirpuri, New Delhi.

A total of **128 children** were screened, and one child was suspected of having congenital heart defects (CHD) and received prompt treatment.

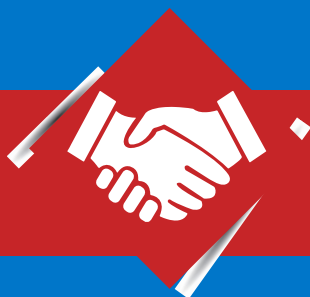

Medical and Awareness Session in Meerut Slum Areas

On February 1st, a medical and awareness session was held in the slum areas of Meerut, where over 189 children were screened for health issues. Two children were suspected of having congenital heart defects (CHD) and are receiving further treatment. ASHA workers and Anganwadi staff also participated in the session, learning about the symptoms of CHD and how to identify them early for timely intervention.

Medical Camp in Slums

On February 1, 2025, the Childheart Foundation, in collaboration with ABB, held a successful medical camp in Delhi. A total of 200 children were screened, and 6 children were suspected of having congenital heart defects (CHD) and are receiving further treatment. This camp provided crucial health screenings and support to local children.
